Office Action Summary

Art Unit: 1617

A supplemental election of species is required because the original requirement, Paper #9, filed 12/29/99, was in error regarding the election over water soluble polymers.

mepeg
Claim 13 is generic to a plurality of disclosed patentably distinct species comprising water soluble polymers. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

The examiners is aware that applicant^s elected insoluble^{polymer} is in combination wit^h MePEG^h, however applicants are not necessarily limited to Me PEG by the election of the insoluble polymer.
